osamakahsay.dev

github.com/Owasamly

Cybersecurity master's student building secure software, Kubernetes platforms, CI/CD automation, and infrastructure-as-code. Founded a delivery platform with 3,000+ registered users. Seeking working-student or industry thesis roles across cybersecurity, DevSecOps, cloud/platform infrastructure, and software engineering.

TECHNICAL SKILLS

Python

Linux

Git

Docker

Kubernetes

Terraform

GitHub Actions

Argo CD

OPA/Rego

Falco

SELECTED TECHNICAL PROJECTS

Kubernetes Runtime Security

Kubernetes · k3d · Helm · Falco · OWASP Juice Shop | GitHub

Task

- Built a six-node Kubernetes environment with autoscaling from 3 to 9 replicas and a custom Falco rule detecting interactive container shells.

Continuous Kubernetes GitOps

Docker · Kubernetes · Helm · Argo CD · Git | GitHub

Task

- Deployed a containerized application through Helm and Argo CD, enabling automated synchronization, pruning, and self-healing from Git.

Infrastructure Guardrails with Policy-As-Code

Terraform · LocalStack · OPA/Rego · GitHub Actions | GitHub

Task

- Built Terraform guardrails with Rego policies that block public, unencrypted, or unversioned S3 configurations before deployment.

EXPERIENCE

Co-founder & Software Developer

MK Delivery (Starup)

05/2024 - 06/2025

Achievements

- Founded and operated a delivery platform connecting customers with local restaurants and cafés, growing it to 3,000+ registered users and 1,000+ Google Play installs.
- Onboarded and supported multiple restaurants and cafés, translating their operational requirements into product features.
- Managed the product lifecycle from development and release to marketing, maintenance and user support.

IT Security & Development Intern

Mekelle University - ICT Department

01/2024 - 06/2024

Achievements

- Contributed to the development of an ICT Resource Management System for organizing and tracking departmental resources.
- Gathered requirements from ICT staff and translated existing manual processes into application features.
- Implemented authentication and role-based permissions to restrict access to administrative functions and resource records.

EDUCATION

M.Sc in Cyber Security

Hochschule der Bayerischen Wirtschaft

10/2025 - Present

Munich, Germany

Relevant coursework

- Systems Analysis and Hardening
 - Applied Cryptography
 - Introduction to Docker
- Linux Basics
 - Computer Systems and Networks
 - Application Development and Security Lifecycle

B.Sc. in Electrical & Computer Engineering (Stream of Computer Engineering)

Mekelle University

09/2017 - 11/2024

Mekelle, Ethiopia

Relevant coursework

- Advanced Computer Networks
 - Data Structures and Algorithms
 - Computer Network Security
- Database Systems
 - Programming Languages.
 - Operating Systems

TECHNICAL SKILLS

Programming & APIs	Python, JavaScript, Node.js, Bash, REST APIs
Containers & Infrastructure	Docker, Kubernetes, Helm, k3d, Terraform, LocalStack
DevSecOps & Security	GitHub Actions, Argo CD, OPA/Rego, Falco, Trivy, Semgrep, TruffleHog
Systems & Data	Linux, Git/GitHub, PostgreSQL, MySQL, MongoDB, Firebase, Wireshark

RESEARCH & THESIS INTERESTS

- Feedback-Driven Autonomous Binary Analysis (FABA)
- Agentic DevSecOps for Continuous Audit and Monitoring
- Verifiable Software Supply Chains for Kubernetes
